## Work History

---

**Since April 2021 to Till Date** Lonrix Ltd , Hamilton, Waikato New Zealand  
Senior Front End Developer ( Work From Home , 30 Hours / Week )

### Company Information

Lonrix Limited is an agile, dynamic team of civil engineers, software engineers and data analysts. We are passionate about building products that make a positive and lasting impact on the day-to-day operations of clients across the globe. As a team, we have more than 50 years of combined experience in software development and asset management systems. Our team members have extensive international experience having worked on projects in

Australia, Indonesia, South Africa, Malaysia and New Zealand. As such we bring a wide perspective and considerable experience to each project that we undertake. Website : <https://www.lonrix.com/>

### **Achievements**

- In Lonrix, I started working as a UI Developer on their flagship product **Juno Viewer** from the very first day and within couple of weeks familiar with the product and work flow.
- **Juno Viewer**, web-based (asp.net) asset management systems to manage data and decision making on road and rail networks, first two months I was working on maintenance and bug fixing both in the UI and Server Side Coding according the issues raised by the clients in the real time process. After that worked on two new projects under the same products as Front end developer and accomplish medium to highly complicated tasks based on front end technologies like JavaScript, jQuery, JSON, Bootstrap, HTML and CSS and also some tasks in C#.

### **Projects**

- **Network Map View Version 3** (Google MAP based project under Juno Viewer, which help the user to switch to different networks and segments very easily access to various reports and make decisions in a better way. I worked in this project as Leading UI Developer to build the map with various data according to the user request. I can't explain about the technical terms or working model of the project as per the Agreement with the company. The project started on June 2021, beta version released on September 2021).
- **FWP Management and Summary Reports** (Is a work management and report generation project under Juno Viewer. And its main aim was to combine different existing feature to a single window and improve the user experience. Worked in this project as Senior Front end Developer and coordinates the task with the UI Developer Team. The project started on October 2021, beta version released on November 2021).

### **Responsibilities**

- Team Lead, Front End Developer.

**Since November 2012 to Till Date**      **Jazz Solutions Pvt Ltd, India**  
**Senior Developer, Director**

### **Company Information**

Software company in Kerala since 2012, who actively involved in providing software and web solutions. And also gave assistance on academic projects to more than 500 students every year.

### **Achievements**

- As a Founder of Jazz Solutions, it is a big success that the company can maintain a continuous growth on all operational areas like software development, web development and training division.
- As a Developer, I can work as the lead developer on long term projects named IG-CAMPUS, and CA-SOFT and make it successful and fulfil the clients.

### **Projects**

- IG-CAMPUS (windows based application on college activity management).
- CA\_SOFT (windows based application on Chartered Accountant Client Management).
- Handled more than 1000 students on their academic projects.
- Dozens of web designing for local clients.

### **Responsibilities**

- Team Lead, Front End Developer, Database Designing, PHP Developer, .Net Developer, Office Management, Academic Project Trainer, Conducts lots of Seminars in professional colleges to introduce various technologies to students.

**June 2016- November 2019** UPWORK, Freelance Online Platform

### UI Developer

#### Company Information

Am very passionate in learning new technology and work with good developers globally so I joined in upwork in 2016 and work with dozens of developers, start-ups and entrepreneurs and maintain good work relationship with them even outside upwork.
